

Defender Birincil Standart Kalibrator

- Designed exclusively for the occupational health and safety industry and built on next-generation DryCal® technology
- Easy CalChek automatic calibration with SKC AirChek and Leland Legacy pumps
- Laboratory accuracy certified by NIST through NVLAP and backed by ISO 17025 accreditation, ANSI Z-540, and NIST Handbook 150
- Choice of 3 wide flow ranges
 - 5 to 500 ml
 - 50 ml to 5 liters
 - 300 ml to 30 liters
- Large illuminated graphical display with zoom feature
- Sleek new design fits in a briefcase and weighs only 29 ounces (0.8 kg)
- Optimizer Software for data transfer to a PC

Three DEFENDER Models to Meet Your Applications

Defender 510: 1% accuracy volumetric calibration for personal air samplers and other volumetric instruments

Defender 520: with 1% volumetric accuracy, Defender 520 also records ambient temperature and pressure at time of calibration for enhanced audit trail

Defender 530: 1% accuracy volumetric and 1.2 % accuracy standardized calibration for environmental applications and calibrating mass flow meters and controllers
